

ADHAM REDA

Data Analyst

El Mansoura, Dakahlia, Egypt · adhashmax@gmail.com · [linkedin.com/in/adham-reda77](https://www.linkedin.com/in/adham-reda77) · github.com/AdhamrEDA11

PROFILE

Data Analyst with a Computer Science and Artificial Intelligence background and hands-on training through the Digital Egypt Pioneers Initiative (DEPI) Data Analyst track. Experienced across the analytics workflow — data cleaning, exploratory analysis, SQL, KPI development, data modeling, DAX, and interactive dashboard design — with a focus on translating business questions into clear, actionable insights.

TECHNICAL SKILLS

Data Analysis	Data Cleaning, EDA, KPI Analysis, Statistical Analysis
Programming	Python, pandas, Streamlit
Databases	SQL, SQL Server, Relational Databases
BI & Visualization	Power BI, DAX, Excel, Pivot Tables, Pivot Charts, Dashboard Design
Other	Firebase / Firestore, CRM Analysis, Communication

EXPERIENCE

Data Analyst Intern — Digital Egypt Pioneers Initiative (DEPI) <i>Cairo, Egypt · Hybrid</i>	<i>Jul 2026 – Present</i>
- Applied statistical analysis techniques on retail and service datasets using Python (pandas), producing cleaned, analysis-ready datasets. - Performed exploratory data analysis and business reporting using SQL and Excel, translating raw data into structured summaries for stakeholder review.	

SELECTED PROJECTS

Space Tourism Booking Dashboard Built a Streamlit app for interactive, documented data cleaning against a SQL Server backend, then modeled the cleaned data in Power BI to analyze 3 years of booking data. <i>Tools: Python, Streamlit, SQL Server, Power BI, DAX</i>	\$306.09B revenue · 9.02K bookings
Services Branch Analysis Designed a relational database in SQL Server and modeled it in Power BI to analyze service operations across 4 regions and 5 departments. <i>Tools: SQL Server, Python, Power BI, DAX</i>	\$195.3M revenue · 217K service hours
Superstore Sales Analysis Built an OOP-based Python pipeline (cleaning, outlier handling, EDA) and a separate interactive Excel dashboard to analyze a 9,994-record retail dataset and identify profit and discount-related patterns. <i>Tools: Python, pandas, Excel</i>	\$2.29M sales · \$286K profit
Car Inventory & Sales Dashboard Cleaned and structured a multi-brand car inventory dataset and built an interactive dashboard tracking inventory status, dealer performance, and profitability. <i>Tools: Excel, Pivot Tables, Pivot Charts</i>	

EDUCATION

B.Sc. Computer Science and Artificial Intelligence Benha University, Benha, Egypt <i>In Progress · CGPA 3.2 (Very Good)</i>
