PROFESSIONAL SUMMARY

Aspiring Data Analyst with a Computer Science and Artificial Intelligence background, currently completing the Digital Egypt Pioneers Initiative (DEPI) Data Analyst track. Turns raw data into structured, decision-ready insights using Python (pandas), SQL, Excel, and Power BI — covering data cleaning, exploratory analysis, KPI reporting, and interactive dashboard development. Also working as a web developer, with practical exposure to structuring and managing real data (Firebase/Firestore).

EXPERIENCE

Data Analyst Intern Jul 2026 – Present
Cairo, Egypt · Hybrid

- Applied statistical analysis techniques on retail/service datasets using Python (pandas) as part of DEPI training, producing cleaned datasets ready for exploratory analysis.
- Performed exploratory data analysis and business reporting exercises using SQL and Excel during DEPI training, translating raw data into structured summaries for stakeholder review.

SELECTED PROJECTS

Car Inventory & Sales Dashboard | Excel, Pivot Tables, Pivot Charts

- Cleaned and structured a 1,000-record car inventory dataset spanning 20 brands, 145 models, and 10 categories using Microsoft Excel.
- Designed an interactive dashboard tracking inventory status (575 sold, 249 available, 112 reserved, 64 in service) and profitability (67% profit margin, \$47.59K average revenue per sale) across dealers, regions, fuel types, and transmission types.

Superstore Sales Analysis | Python, pandas, SQL, Excel

- Built a structured, OOP-based Jupyter notebook to clean, explore, and analyze the Superstore retail dataset (9,994 orders), producing KPI summaries, visualizations, and exported reports.
- Queried and joined multi-table retail data using SQL (SELECT, WHERE, GROUP BY, JOIN), enabling filtered, aggregated views for sales analysis.
- Built an interactive Excel dashboard with slicers (Region, Category, Ship Mode, Year) and multiple chart types, tracking \$2.29M in sales and \$286K in profit across categories, regions, and time, including profit-vs-loss and discount-impact analysis.

Services Branch Analysis | SQL Server, Power BI, DAX

- Modeled a relational data structure in Power BI (Branch, Services, and Date tables) and combined SQL Server and Power BI to build an interactive revenue and performance dashboard.
- Tracked \$195.3M in total revenue and 217K total service hours across 4 regions and 5 departments, with DAX measures for revenue share by region, monthly/quarterly trends, and client-level reporting.

TECHNICAL SKILLS

Data Analysis: Data Cleaning, Exploratory Data Analysis (EDA), KPI Analysis, Statistical Analysis

Programming: Python, pandas

Databases: SQL, SQL Server, Relational Databases

BI & Visualization: Power BI, DAX, Excel (Pivot Tables, Pivot Charts, Dashboard Design)

Other: CRM Analysis (Firebase/Firestore), Communication

CERTIFICATIONS

SQL and Relational Databases 101

IBM / CognitiveClass.ai
Issued Aug 2026 · Credential ID: DB0101EN

Oracle Fusion AI Agent Studio Foundations Associate

Oracle
Issued Aug 2026 · Score: 98% · Credential ID: 1Z0-1145-1

Data Fundamentals

IBM SkillsBuild
Issued Aug 2026 · Topics: Data Analysis, Data Visualization, Data Cleaning

EDUCATION

B.Sc. in Computer Science and Artificial Intelligence

Benha University, Benha, Egypt — Currently Pursuing (3st Year) Current CGPA: 3.2 · Current Overall Grade: Very Good

LANGUAGES

Arabic — Native | English — Conversational
